

Eastman Turbo Oil 25™

Formulated for the high load-carrying demands of today's helicopter transmission systems

Optimal transmission and gearbox life—high-gear load-carrying capability protects against wear in critical systems.

Reliable performance—proven performance in helicopter transmissions and enhanced gear wear protection

Eastman Turbo Oil 25 (ETO 25) is a 5-cSt lubricant offering exceptional high load-carrying ability over Type II oils in helicopter gearboxes and transmissions. ETO 25 was originally developed to meet the extreme demands of the Concorde's supersonic flight.

The high-gear load-carrying ability of ETO 25 earned its approval against U.S. Military Specification DOD-PRF-85734 for helicopter transmission systems. The in-service experience of ETO 25 in this application has been proven over many years.
